LUCAS TREMBLAY-MOLL

Terrebonne, QC, Canada • ltremblaymoll@gmail.com • +1 514-691-3351 •

Work Status: US Citizen | Authorized to work in US & Canada

PROFESSIONAL SUMMARY

Results-driven Senior Cloud Platform & Infrastructure Reliability Engineer with 5+ years of experience engineering, administering, and automating enterprise-scale distributed systems and multi-cloud infrastructure (Amazon Web Services / AWS and Microsoft Azure). Proven expertise in Infrastructure as Code (IaC), automated Continuous Integration / Continuous Deployment (CI/CD) pipelines, containerized environments, zero trust network security baselines, and toil reduction to maintain high availability (HA) and enterprise system reliability.

TECHNICAL SKILLS

Cloud Platforms & Architecture: Amazon Web Services (AWS), Microsoft Azure, Multi-Cloud Architecture, Distributed Systems, Microservices Infrastructure, Kubernetes

Infrastructure as Code (IaC): Terraform, HashiCorp Suite, Azure ARM Templates, CloudFormation

Configuration & Platform Management: Red Hat Ansible Automation Platform (AAP), Chef, Configuration as Code (CasC)

Software Development & Scripting: Python, Bash, PowerShell, Java, Shell Scripting, Git Version Control

Operating Systems & Compute: Red Hat Enterprise Linux (RHEL), Ubuntu Linux, Windows Server, Oracle Linux

Reliability, Observability & Operations: Azure Site Recovery (ASR), Disaster Recovery (DR) Testing, Patch Orchestration, High Availability (HA), Enterprise Logging & Telemetry, Mean Time to Resolution (MTTR) Optimization

Security & Networking: Zero Trust Network Security, Endpoint Protection, Vulnerability Management, Enterprise Authentication, VPNs, Firewalls, Load Balancers

WORK EXPERIENCE

Manulife Financial Inc.
Montréal, Québec, Canada

Cloud Platform Engineer
Mar 2025 – Oct 2026

- **Platform Leadership & Uptime:** Led administration, governance, and Service Level Agreement (SLA) reliability for the Global Red Hat Ansible Automation Platform (AAP), ensuring high availability and multi-cloud continuous uptime across AWS and Azure distributed environments.
- **IaC & Cloud Automation:** Engineered scalable Infrastructure as Code (IaC) and Configuration as Code (CasC) workflows using Terraform and Ansible, automating deployment and lifecycle management for 7,000+ Linux (RHEL/Ubuntu) and Windows Virtual Machines (VMs).
- **CI/CD & Toil Reduction:** Scripted automated operational tasks utilizing Python, Bash, and PowerShell within Continuous Integration / Continuous Deployment (CI/CD) pipelines to eliminate manual toil, streamline patch orchestration, and accelerate infrastructure delivery.
- **Security & Governance:** Hardened distributed system resiliency and security compliance by integrating automated vulnerability management, endpoint protection, and unified zero trust authentication baselines into deployment workflows.

Associate Infrastructure Reliability Engineer
Mar 2021 – Mar 2025

- **Cloud Infrastructure Management:** Managed core Azure and AWS cloud services (Compute VMs, Disks, Virtual Networks / VNet / NICs, Resource Groups, and Recovery Vaults) using automated IaC templates and CI/CD automation pipelines.
- **Disaster Recovery & HA:** Designed and maintained PowerShell automation for Azure Site Recovery (ASR) failover testing, automated backup validation, and disaster recovery orchestration across enterprise infrastructure fleets.
- **OS Internals & Troubleshooting:** Delivered Tier-3 system administration and deep technical OS-level

WORK EXPERIENCE (CONTINUED)

Group Dynamite Inc. Montréal, Québec, Canada
Technical Services Representative Feb 2019 – Aug 2021

- **Infrastructure & Network Support:** Delivered Tier 1 & Tier 2 technical support for Point-of-Sale (POS) systems, store hardware, and enterprise network connectivity across multi-site retail locations.
- **Vendor Coordination & SLOs:** Coordinated cross-functional troubleshooting efforts with external vendor partners (Bell Canada, Granite Telecommunications, Chase Payments) to meet stringent Service Level Objectives (SLOs).

EDUCATION & TRAINING

Dawson College Montréal, Québec, Canada
Diplôme d'études collégiales (DEC) – General Social Sciences 2015 – 2019

Computer Science Technology Coursework (2016 – 2017): Focused on Shell Scripting (Fedora/RHEL), Linux System Administration, Java Programming, and Web Development (HTML/CSS/JS).
